

Sending Pictures for the Heatherwood Website

I wanted to mention some guidelines for any pictures that you would like me to add to the Heatherwood website.

First and most important, bigger is **NOT** better. The size of a picture is determined by the way in which it is captured. Whether it is from your phone, digital camera or from hard copies you scan.

While large pictures taken at a higher resolution are good if you are going to later print hard copy photos, large size photos are not required for PC viewing. They take up a lot of storage and they can be very difficult to work with on a PC. In addition, they will take much longer for you to open for viewing. Setting your camera to a lower resolution setting will capture them at a smaller size.

If you only have a few pictures to send, you can attach them in an email to me. If you have a large quantity, it would be better if you put them on a portable thumb drive, CD or DVD.

Contact me at **heatherwoodnj@comcast.net** or 856-228-5614 with any questions.
